Cal EOC Incident – 2014 Drought

- SOC / Inland REOC remains activated in support of 2014 Drought

WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Medford Weather:

A trough is weakening as it moves inland this morning. The radar is showing some light showers in upslope flow into the Cascades and surface observations have only shown a few hundredths of an inch so far. A trough is weakening as it moves inland this morning. The radar is showing some light showers in upslope flow into the cascades and surface observations have only shown a few hundredths of an inch so far.

Eureka weather:

Another weak system will bring light rain north of Cape Mendocino mainly this morning. High pressure will return on Monday and Tuesday bringing warm and dry weather. Chances for more significant rain and a return of cooler temperatures are expected by the middle of next week.

Reno Weather:

High pressure near the West Coast will keep above average temperatures and generally light winds into early next week, except for some stronger gusts in higher elevations on Sunday. A fast moving storm will bring a return of wintry conditions Wednesday and Thursday with gusty winds, rain, and mountain snow.

Sacramento Weather:

Dry weather with near-record high temperatures are expected early this week. Wetter and cooler weather expected middle-to-late this week.

San Francisco Weather:

High pressure will strengthen over California during the next few days. Record high temperatures are possible through Tuesday. Cooling is forecast for Wednesday as a low pressure trough approaches with rain becoming likely Wednesday night into Thursday. Rain chances will continue in the North through Friday. Dry weather is forecast to return to all areas by next weekend.

WEATHER

WEATHER SYNOPSIS BY REGION:

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:

Hanford Weather:

High pressure will continue to bring dry weather to the Central California interior through Tuesday with patchy night and morning fog in the San Joaquin valley. A low pressure system will bring rain and high sierra snow to the area Wednesday night and Thursday.

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Other than some coastal low clouds and fog across Los Angeles County early this morning warm and dry weather is expected through Tuesday with some record high temperatures possible. Gusty offshore winds will affect portions of the region through Tuesday with the strongest winds expected. Upper level low will bring significant cooling during midweek with a chance of rain late Wednesday into Thursday. Dry weather is expected Friday through Saturday with a slight warming trend.

Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

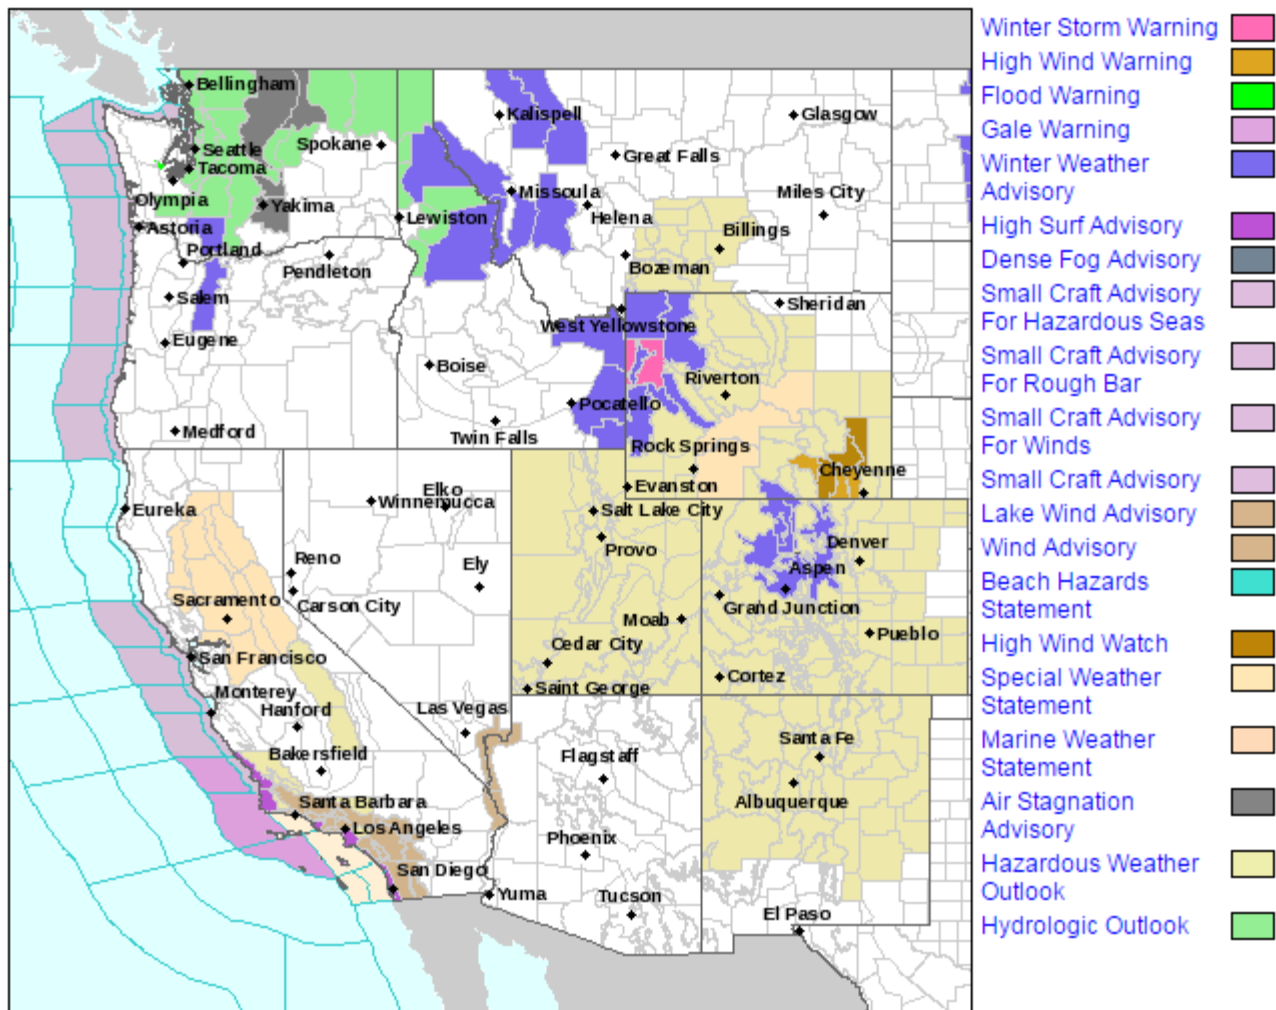

Areas of dense fog near the coast will clear early this morning as developing offshore flow brings strong gusty Santa Ana winds near the coastal foothills for tonight and Monday. High pressure aloft near the west coast will bring warming into Monday with slow cooling spreading inland on Tuesday and Wednesday. For Wednesday night and Thursday a trough of low pressure moving inland along the west coast will bring cooling gusty west winds in the mountains and deserts and a chance of showers. Dry with a warming trend for Friday into next weekend.

Southeast California Weather:

The unrelenting warm air mass over the desert Southwest is still holding strong and will actually warm up more through the middle of this week. Highs will reach record or near record territory through Wednesday with Wednesday likely being the warmest day as highs break 90 degrees in some desert locations. Some minor relief will arrive by the end of the week but temperatures will still remain above seasonal normal and likely still above 80 degrees across much of the lower deserts.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

- The SOC is activated in support of the Drought State of Emergency and continue to monitor the situation.
- The Governor issued Executive Order B-26-14 on 09/19/14, to streamline relief efforts for families with drinking water shortages due to drought, specifically through the California Disaster Assistance Act, to provide temporary water supplies to households without water for drinking and/or sanitation purposes.
- The Governor issued Executive Order B-29-15 on 04/01/15 which announced actions that will save water, increase enforcement to prevent wasteful water use, streamline the state's drought response and invest in new technologies to make California more drought resilient.
- CDAA 2014 Drought Fact Sheet and Frequently Asked Questions provided to Regions for reference and distribution.
- Cal OES Recovery continues to coordinate the Community Impacts Workgroup conference calls. Currently, the calls take place on the first Wednesday of each month.
- Cal OES Recovery/Individual Assistance finalized an updated 2015 version of the drought brochure of programs and services for individuals, businesses, farmers, and ranchers. It has been put on the Governor's Drought webpage. State agencies may put the following link to the brochure on their webpage <http://ca.gov/drought/pdf/Drought-Assistance-Brochure-2015.pdf>
- Cal OES Regions (Inland, Coastal, Southern) collective OA drought call is facilitated by the SOC and will be held once per month.

CAL OES 2014 DROUGHT

Cal EOC Incident – 2014 Drought

CAL OES MISSIONS

Ongoing Missions:

- **2016-LAW-21372, 2/12/16, 1412 hours**, Sacramento County Sheriff's Department, on behalf of the San Joaquin County Sheriff's Office, is requesting the DART Team from Sacramento County for a search in San Joaquin County. DART members will be searching a canal today, 02/13/16, for a weapon used in a homicide that occurred in Walnut Grove. **Mission Ongoing.**

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
